wecompress

Online File Compressor

Compression of large files
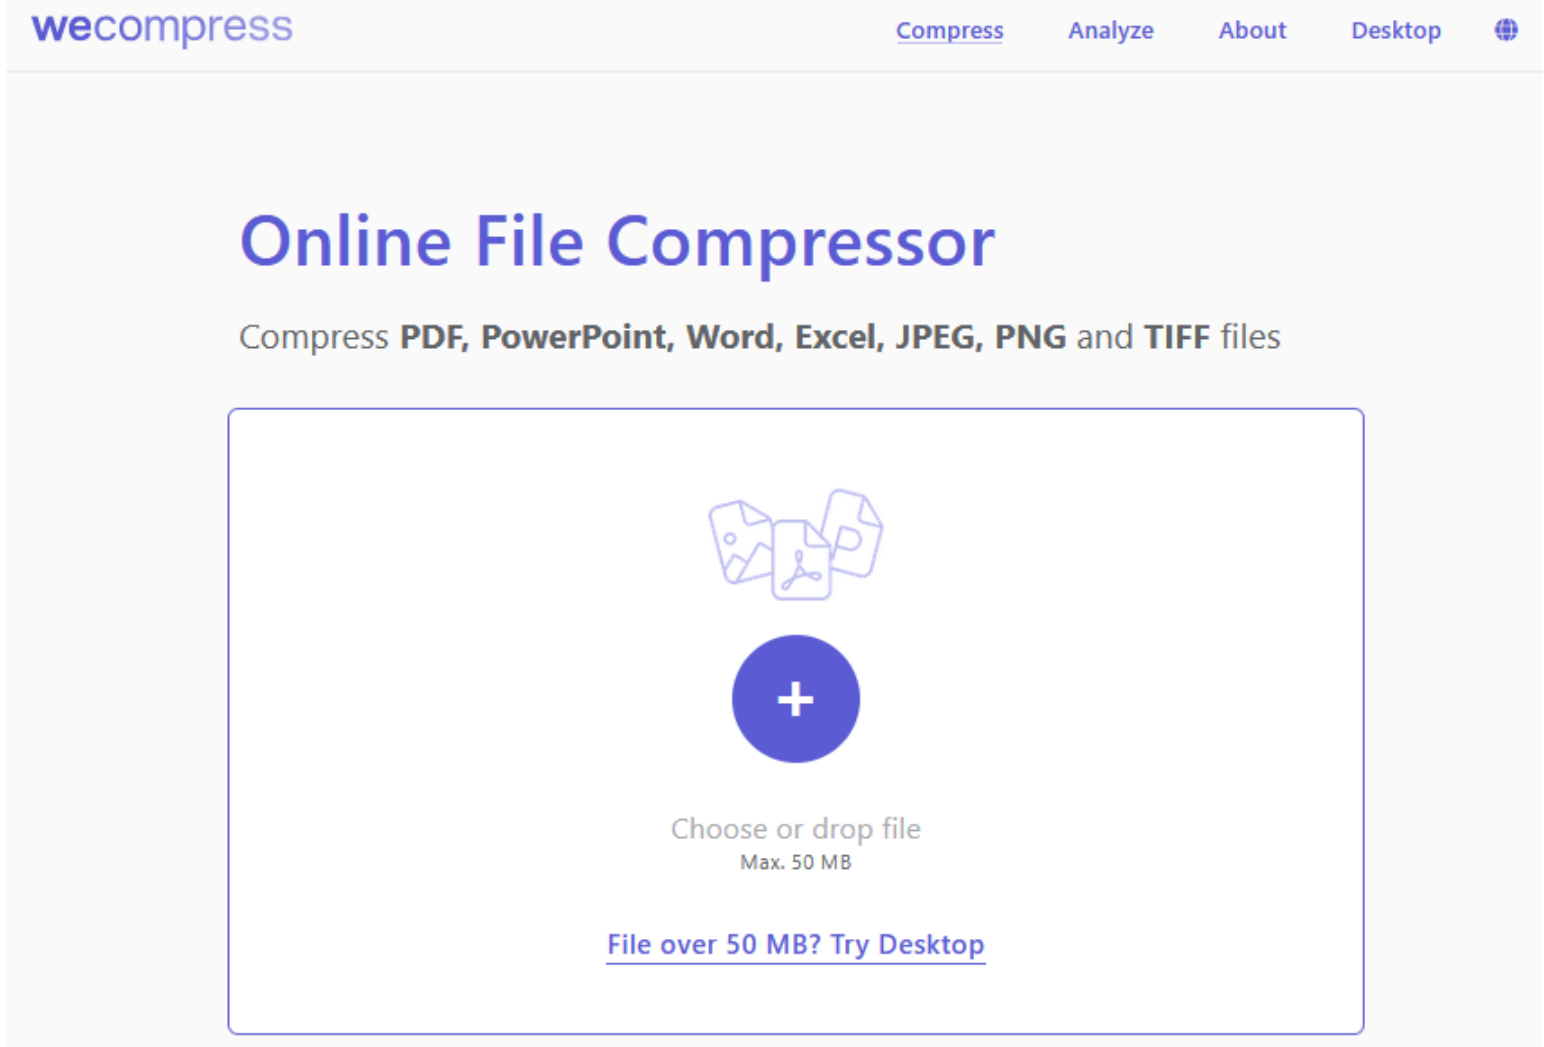

- If you are having difficulty sharing large files in *MS Teams* during online meetings

- If you are having difficulty uploading large files, such as PDF (text), PPTX (presentations), PNG/JPEG (graphics) in the *Moodle* environment because the file size is limited to 10 MB

- We recommend reducing (compressing) the size of documents using online compression tools.

Created: 2025

Compression of large files

- The online tool *Wecompress* (https://www.wecompress.com/en/) can compress files in PDF, PPTX, DOCX, XLSX, JPEG, PNG, and TIFF formats.

- Upload the file you want to compress to the *Wecompress* website.

- The uploaded file will automatically start processing — it will be compressed.

Online File Compressor

Compress **PDF, PowerPoint, Word, Excel, JPEG, PNG** and **TIFF** files

Compression of large files

- The processing takes a few minutes.

- After processing, the result is displayed with the compression percentage and the option to download the processed file.

- The free online version of the *Wecompress* tool allows you to compress files up to 50 MB

File ready

2022.pptx

1.32 MB → **861 KB (36%)**

Download

Notes

Free online file compression tools may limit:

- the size of the uploaded file
- the number of files that can be uploaded per day
- the compression percentage
- the compression speed
- the number of pages
- the graphics resolution.

Compression tools may damage/distort some slides.

It is **recommended** to save PPTX format documents in PDF format and then compress the PDF format document.
